Energy efficient buildings in reconstruction/Tajiksitan

Nicole Stolz

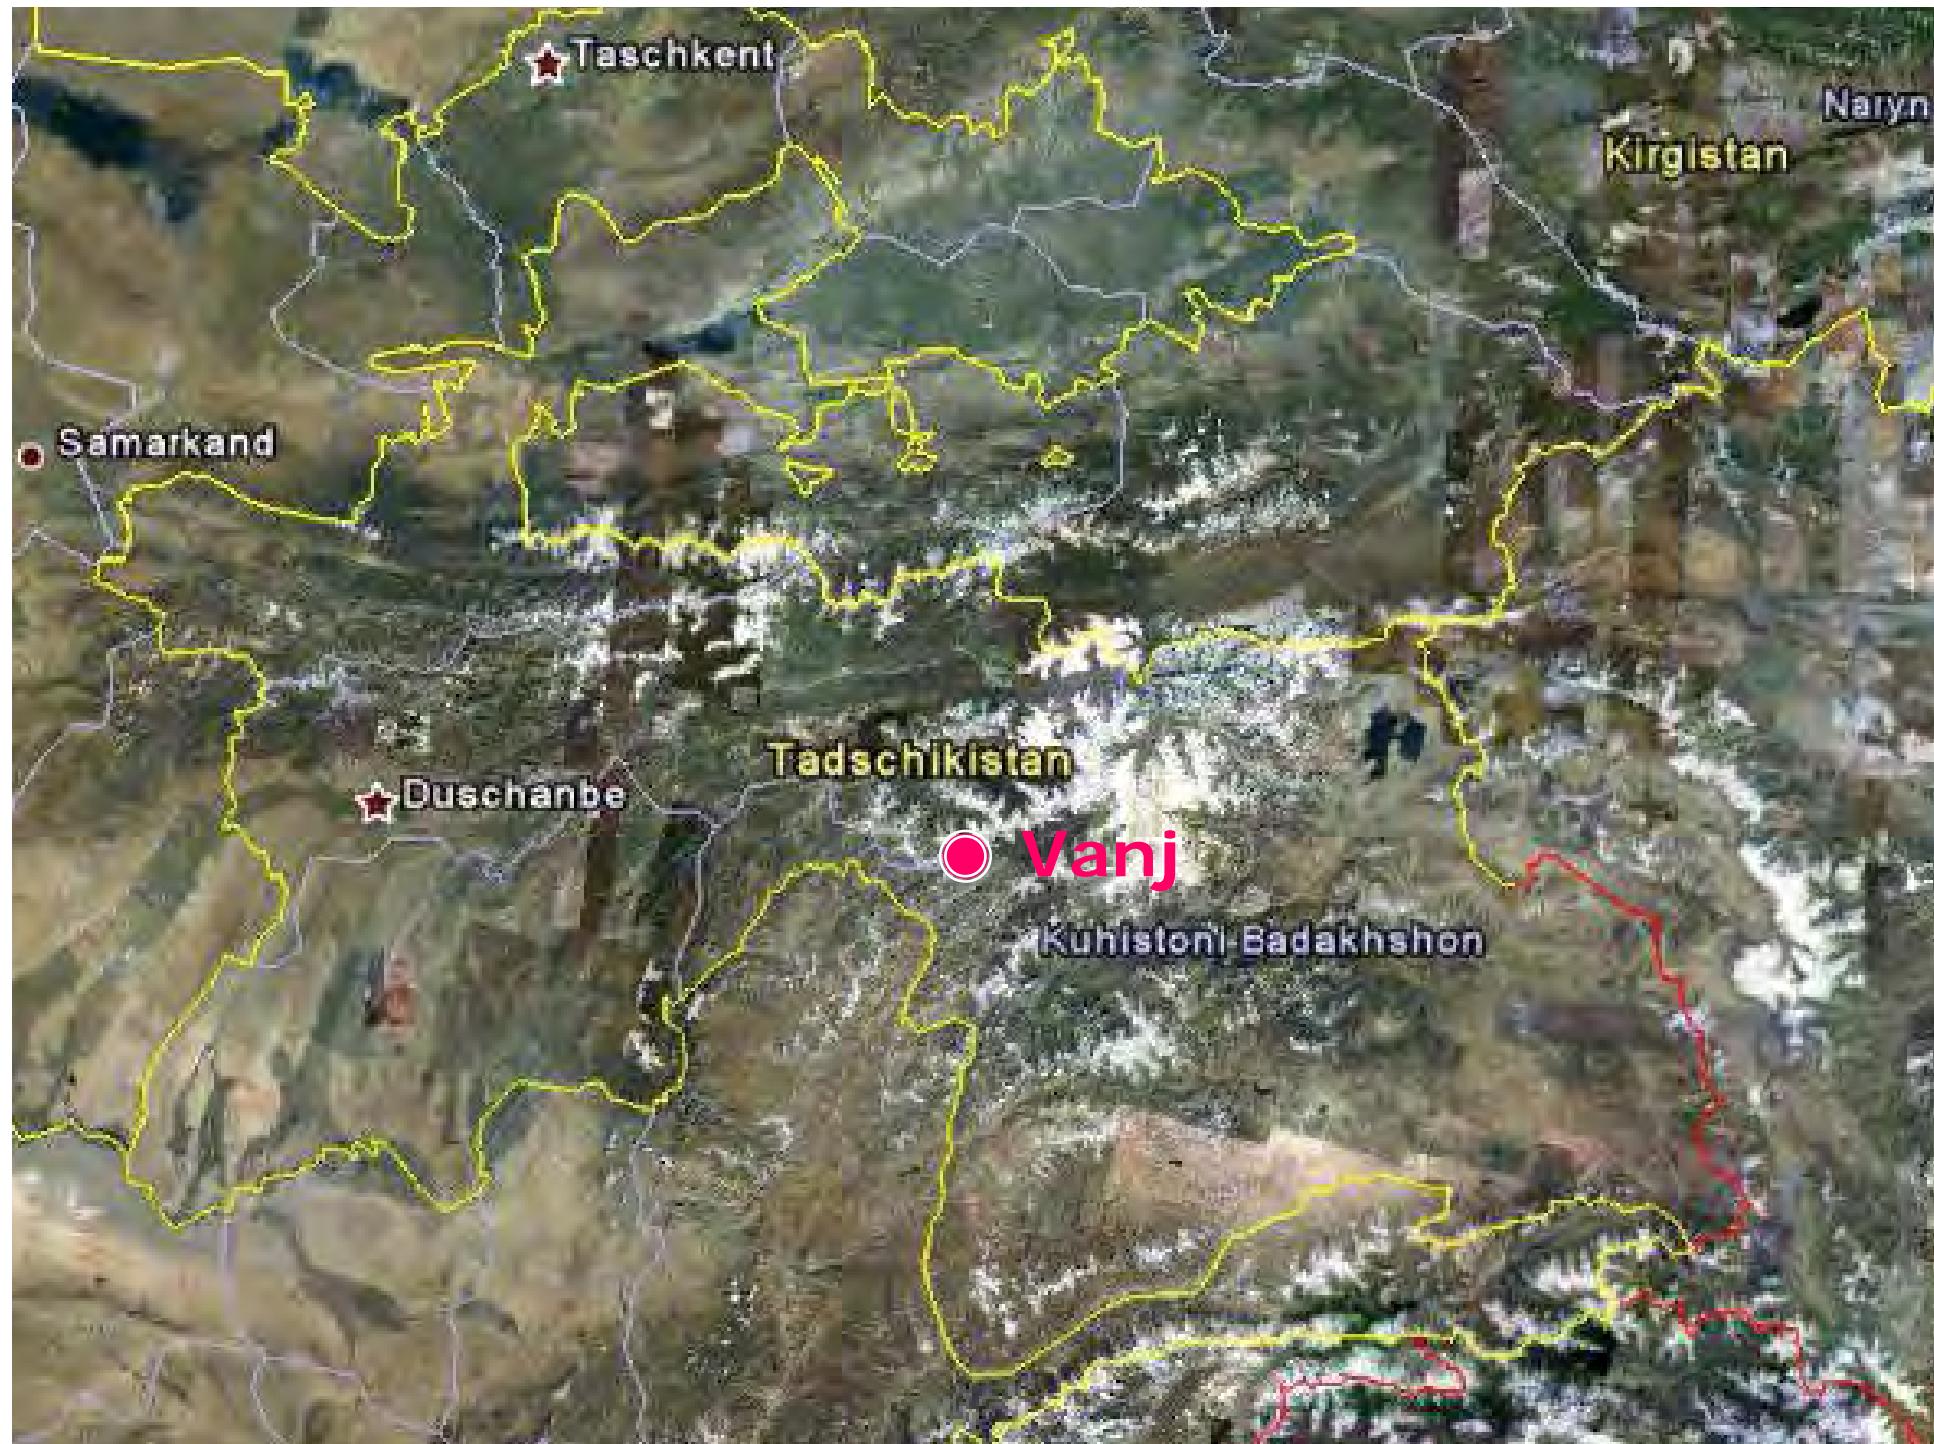

Caritas Suisse

**Earthquake safe and energy efficient Housing
Programme 2010-2011 in Vanj,
Viloyati Mukhtori Kuhistoni-Badakhshon
(Gorno-Badakhshanskaya avtonomnaya oblast – GBAO)
Eastern Tajikistan**

**Phase I – 6 Houses :
Reinforced Masonry**

**Phase II – 9 Houses :
Ferroconcrete Framework with Infill in Bricks**

1. Глиносаманная стяжка 100мм;
2. Слой рубероида ГОСТ 10923-93;
3. Обшивка из досок толщиной 30мм;
4. Деревянные балки покрытия сеч. 30x150мм;

1. Кровля - из черепицы на основании цементного раствора
2. Обрешетка - из брусков 50x50мм, шаг 400мм
3. Стропила - сеч. 50x150мм, шаг 800мм.

1. Сплошной настил из досок по ГОСТ 8242-75, - 30мм;
2. Лага сечением 50х50мм, шаг 600мм
3. Слой рубероида ГОСТ 10923-93;
4. Уплотненный смесь гравия и песка - 150мм;
5. Грунт основания - с втрамбованным щебнем 30-40мм.

**1st status as on 02 May 2011 – 15% completion
Vanj phase I # 5 Shonazriev Zher**

**2nd status as on 18 May 2011 – 27% completion
Vanj phase I # 5 Shonazriev Zher**

**3rd status as on 24 May 2011 – 30% completion
Vanj phase I # 5 Shonazriev Zher**

**4th status as on 08 June 2011 – 53% completion
Vanj phase I # 5 Shonazriev Zher**

**5th status as on 22 June 2011 – 58% completion
Vanj phase I # 5 Shonazriev Zher**

**6th status as on 30 June 2011 – 68% completion
Vanj phase I # 5 Shonazriev Zher**

**7th status as on 15 July 2011 – 80% completion
Vanj phase I # 5 Shonazriev Zher**

**8th status as on 21 July 2011 – 96% completion
Vanj phase I # 5 Shonazriev Zher**

**9th status as on 30 July 2011 – 97% completion
Vanj phase I # 5 Shonazriev Zher**

**10th status as on 10 August 2011 – 100% completion
Vanj phase I # 5 Shonazriev Zher**

Cost-benefit analyse

- Per month 2 bundles of wood are used for heating, each of a bundle cost of 50 Somoni / 10 CHF = 20 CHF per month
- The normal heating period is November to March i.e. 5 month = 5x20 CHF 100 CHF
- An average investment cost for the insulation is 350 CHF (labor + local materials as mud and straw)
- → after the 4th winter the investment is paying off

Achievements

- 200 persons introduced into improved building practice
- University of Central Asia used best practice to enrich their curriculum for masons
- 2 local planning offices introduced to Ehrsam cost benefit calculations
- Increased awareness of INGO and government about insulation benefits
- 15 houses reconstructed for the most vulnerable

Challenges

- Not all technology is socially and culturally accepted
 - PTD and local knowledge and science combination
- To introduce new technologies and policies don't start at the remotest place
 - Combine local action and national policy dialog

Svizra

Nous sommes solidaires. ■

Challenges

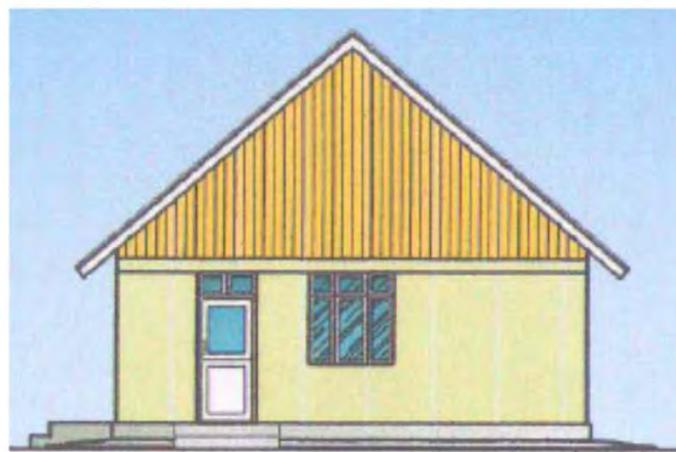

- Short term benefits for people vs longer term investments
 - Calculation and financing incentives, political and livelihoods priorities are different?
- The „Sodis“ challenge: technologies labeled as „poor“ like straw bale houses are difficult to introduce
 - How to make good innovation a demand?
